IMPORTANT NOTES RELATING TO FEES

Blended delivery: Please note when courses are delivered via blended delivery, **participants do not complete all course work in the class room**. Reading and theory assessment must be completed prior to the course, or within 14 days. Failure to do so will require participants to be reassessed in practical competencies. Participants will not be deemed competent until all required assessments have been successfully completed within the allowable time frame. Participants are required to choose the most appropriate delivery method to meet their needs.

Community Centre pricing: Courses delivered through Community Centre programs, where the community centre takes all enquiries, enrolments and payments, will incur an amenities charge. The charge is established by Community Centre management. Please contact the centre direct to confirm pricing and enrolment procedures. Centre contact information is included on the calendar listing.
